this is the most comprehensive account to date of literary politics in nazi germany and of the institutions organizations and people who controlled german literature during the third reich barbian details a media dictatorship involving the persecution and control of writers publishers and libraries but also voluntary assimilation and pre-emptive self-censorship that began almost immediately under the national socialists leading to authors forced declarations of loyalty literary propaganda censorship and book burnings special attention is given to nazi regulation of the publishing industry and command over all forms of publication and dissemination from the most prestigious publishing houses to the smallest municipal and school libraries barbian also shows that although the nazis censored books not in line with party aims many publishers and writers took advantage of loopholes in their system of control supporting his work with exhaustive research of original sources barbian describes a society in which everybody who was not openly opposed to it participated in the system whether as a writer an editor or even as an ordinary visitor to a library

this study provides an appraisal of germany s air forces from the post world war i era through the early stages of world war ii the author demolishes several myths surrounding the luftwaffe including the belief that they had no ideas beyond the support of ground forces

rabbi educator intellectual and community leader leo baeck 1873 1956 was one of the most important jewish figures of prewar germany the publication of his 1905 *das wesen des judentums* the essence of judaism established him as a major voice for liberal judaism he served as a chaplain to the german army during the first world war and in the years following resisting the call of political zionism he expressed his commitment to the belief in a vibrant place for jews in a new germany this hope was dashed with the rise of nazism and from 1933 on and continuing even after his deportation to theresienstadt he worked tirelessly in his capacity as a leader of the german jewish community to offer his coreligionists whatever practical intellectual and spiritual support remained possible while others after the war worked to rebuild german jewish life from the ashes a disillusioned baeck pronounced the effort misguided

and spent the rest of his life in England yet his name is perhaps best known today from the Leo Baeck Institutes in New York, London, Berlin, and Jerusalem dedicated to the preservation of the cultural heritage of German-speaking Jewry. Michael A. Meyer has written a biography that gives equal consideration to Leo Baeck's place as a courageous community leader and as one of the most significant Jewish religious thinkers of the twentieth century, comparable to such better-known figures as Martin Buber, Franz Rosenzweig, and Abraham Joshua Heschel. According to Meyer, to understand Baeck fully, one must probe not only his thought and public activity but also his personality, generally described as gentle and kind, though he could also be combative when necessary and a streak of puritanism and an outsized veneration for martyrdom ran through his psychological makeup. Drawing on a broad variety of sources, some coming to light only in recent years but especially turning to Baeck's own writings, Meyer presents a complex and nuanced image of one of the most noteworthy personalities in the Jewish history of our age.

Adolf Hitler had high hopes for his conquest of Norway, which held both great symbolic and great strategic value for the Führer. Despite early successes, however, his ambitious northern campaign foundered and ultimately failed. Adam Claassen, for the first time, reveals the full story of this neglected episode and shows how it helped doom the Third Reich. The German Navy and the Luftwaffe were determined to take and keep Norway by doing so they hoped to preempt Allied attempts to outflank Germany, protect sea lanes for German ships, access precious Scandinavian minerals for war production, and provide a launchpad for Luftwaffe and naval operations against Great Britain. Beyond those strategic objectives, Hitler also envisioned Norway as part of a pan-Nordic stronghold, a centerpiece of his new world order. But as Claassen shows, Hitler's grand expectations were never realized. The Luftwaffe was the vital spearhead in the invasion of Norway, which marked a number of wartime firsts: among other things, it involved the first large-scale aerial operations over sea rather than land, the first time operational objectives and logistical needs were fulfilled by air power, and the first deployment of paratroopers. Although it got off to a promising start, the German effort, particularly against British and Arctic convoys, was greatly hampered by flawed strategic thinking, interservice rivalries between the Luftwaffe and Navy, the failure to develop a long-range heavy bomber, the diversion of planes and personnel to shore up the German war effort elsewhere, and the northern theater's harsh climate and terrain. Claassen's study covers every aspect of this ill-fated campaign from the 1940 invasion until war's end and shows how it was eventually relegated to a backwater status as Germany fought to survive in an increasingly unwinnable war. His compelling account sharpens our picture of the German Air Force and widens our understanding of the Third Reich's way of war.

Were Pope Pius XII and the Catholic Church in Germany unduly singled out after 1945 for their conduct during the National Socialist era? Mark Edward Ruff explores the bitter controversies that broke out in the Federal Republic of Germany from 1945 to 1980 over the Catholic Church's relationship to the Nazis. He explores why these cultural wars consumed such energy, dominated headlines, triggered lawsuits, and required the intervention of foreign ministries. He argues that the controversies over the Church's relationship to National Socialism were frequently surrogates for conflicts over how the Church was to

position itself in modern society in politics international relations and the media more often than not these exchanges centered on problems perceived as arising from the postwar political ascendancy of roman catholics and the integration of catholic citizens into the societal mainstream

james tent recounts how these men and women from all over germany and from all walks of life struggled to survive in an increasingly hostile society even as their jewish relatives were disappearing into the east it draws on extensive interviews with twenty survivors many of whom were teenagers when hitler came to power to show how half jews coped with conditions on a day to day basis and how the legacy of the hatred they suffered still lingers in their minds

on the murderous road to racial purity hitler encountered unexpected detours largely due to his own crazed views and inconsistent policies regarding jewish identity after centuries of jewish assimilation and intermarriage in german society he discovered that eliminating jews from the rest of the population was more difficult than he d anticipated as bryan riggs shows in this provocative new study nowhere was that heinous process more fraught with contradiction and confusion than in the german military contrary to conventional views riggs reveals that a startlingly large number of german military men were classified by the nazis as jews or partial jews mischlinge in the wake of racial laws first enacted in the mid 1930s riggs demonstrates that the actual number was much higher than previously thought perhaps as many as 150 000 men including decorated veterans and high ranking officers even generals and admirals as riggs fully documents for the first time a great many of these men did not even consider themselves jewish and had embraced the military as a way of life and as devoted patriots eager to serve a revived german nation in turn they had been embraced by the wehrmacht which prior to hitler had given little thought to the race of these men but which was now forced to look deeply into the ancestry of its soldiers the process of investigation and removal however was marred by a highly inconsistent application of nazi law numerous exemptions were made in order to allow a soldier to stay within the ranks or to spare a soldier s parent spouse or other relative from incarceration or far worse hitler s own signature can be found on many of these exemption orders but as the war dragged on nazi politics came to trump military logic even in the face of the wehrmacht s growing manpower needs closing legal loopholes and making it virtually impossible for these soldiers to escape the fate of millions of other victims of the third reich based on a deep and wide ranging research in archival and secondary sources as well as extensive interviews with more than four hundred mischlinge and their relatives riggs study breaks truly new ground in a crowded field and shows from yet another angle the extremely flawed dishonest demeaning and tragic essence of hitler s rule

this is the first book to trace the history of all ethnic minorities in germany during the nineteenth and twentieth centuries ethnic minorities in nineteenth and twentieth century germany argues that all of the different types of states in germany since 1800 have displayed some level of hostility towards ethnic

minorities while this reached its peak under the nazis the book suggests a continuity of intolerance towards ethnic minorities from 1800 that continued into the federal republic during this long period german states were home to three different types of ethnic minorities in the form of dispersed jews and gypsies localized minorities such as serbs poles and danes and immigrants from the 1880s taking a chronological approach that runs into the new millennium panikos panayi traces the history of all of these ethnic groups illustrating their relationship with the german government and with the rest of the german populace he demonstrates that germany provides a perfect testing ground for examining how different forms of rule deal with minorities including monarchy liberal democracy fascism and communism

examines the mechanisms of decision making in the history of nazi germany in relation to two central interacting motives the preparation and waging of an expansionist war and racism the decisions were not hitler s alone but of a whole political class ch 6 p 200 217 deal with the anti jewish measures between 1933 39 ch 13 p 368 399 deal with the annihilation of the jews between 1939 45 suggests that the change in policy from forced emigration and resettlement schemes to genocide may have emerged gradually between august november 1941 hitler may not have given an order but simply assented to proposals and actions already taken by subordinates phases of the final solution were determined by the phases of the war asserts that the nazi regime implicated the whole german population in its crimes thus forestalling any possibility of liberation from within and obliging the allies to demand unconditional surrender
